

THE EDUCATORS OF TOMORROW NEED OUR LEADERSHIP TODAY

As public school employees, we must make our voices heard to ensure that every student has a quality education. By belonging to ONE, Ohio Education Association/National Education Association, and our local association, we can harness the power of our collective voice to advocate for ourselves and our students.

Leadership begins with commitment.

Membership in your association is your pledge of support for public education. Using your collective voices, you and your colleagues are committed to advocating for our interests in areas like professional and licensing standards, healthy, safe, and equitable learning and working spaces, fair living wages, appropriate and accessible resources, and community support for our public schools.

Membership keeps you connected.

You and your colleagues are regularly connected to what's happening locally, statewide, and nationally. ONE engages in and supports member to member connections locally, statewide and nationally. From regional engagement opportunities like virtual trivia nights, athletic and wellness events, and professional development trainings to state and national learning and organizing opportunities, you can engage in networking experiences with other public school employees all year-long.

There is strength in numbers.

Your Association's strength comes from the dedication and engagement of you and your colleagues. ONE members learn how to organize and engage fellow members on the issues that impact your students' success, including working conditions, professional development, competitive wages, quality benefits, and fair contracts.

It's sound economics.

The benefits offered are worth much more than the cost of membership. Join our network of early career and support professionals today to ensure that every new school employee can thrive at work. By supporting the development and retention of early career professionals, we can work together to make sure that every child both today and tomorrow receives a great public education.
